

SOP Version 2.2 Release Notes

(Date of release: 30 October 2025)

New Function

- A new function to allow users to manually fix / unfix subject / module (i.e. to manually lock specific subjects / modules for specific students)

Enhancements

Allocate Elective Subjects	• Enhanced the allocation algorithm for subject group distribution choice 1 to perform subject groups swapping for improving the allocation results of students. • Enhanced the allocation algorithm for subject group distribution choice 2 to better achieve the goal of grouping students of similar abilities together. • Enhanced the backtracking algorithm to perform a series of chained adjustments on subject groups allocation across multiple students to find a better allocation results for students.
User Experience	• Various user interface (UI) refinements

Bug Fixes

- Fixed the calculation problem of satisfaction rate for schools offering two science subjects.
